

PLUG IN to NEXT HUB

and gather to connect, explore and engage in lifelong learning experiences!

According to Merriam Webster, hub means the "center of activity or the focal point." Hubs are everywhere; in transportation, in computer connections, airports and in education. NEXT HUB, a new satellite location of NEXT University, is strategically situated in the Penn Quarter area of Washington, D.C.; an area that is presently morphing into the "hub" of everything up-and-coming.

Within NEXT HUB, students will PLUG IN to an unconventional learning environment that will inspire new ideas and connections between peers and faculty. The use of stimulating colors will increase productivity, lift mood, and improve neural functioning. Living walls and daylighting will aid in the connection to outside improving well-being. Outdoor space will be available for students to recharge and have an additional socialization area.

The new functionality and movability of classroom furniture will support different postures and configurations while learning, resulting in a higher level of engagement, less fatigue and more comfort. The use of new technologies, creative storage, and proper acoustical and visual provisions will add to the overall positive learning space. Hourly childcare will also be available on site.

CEILING HEIGHT 9'

THE FLOOR PLAN WAS DESIGNED TO BEST USE NATURAL LIGHTING, AND ADDITIONALLY, ON THE ELEVENTH FLOOR, TO CREATE A CIRCULATION PATH FOR DAYTIME EXERCISE AS DESIRED BY THE CLIENT. ROOMS NOT ON EXTERIOR WALLS FEATURE PARTIAL OR FULL CURTAIN WALLS, ALLOWING FURTHER PENETRATION OF NATURAL LIGHT. WITH THE USE OF DIMMERS ON ALL FIXTURES, MUCH ENERGY WILL BE SAVED WHEN PRACTICING DAYLIGHT HARVESTING.
