

CONCEPT STATEMENT

NEXT HUB is a cutting edge Higher Education University seeking to be a place for adult individuals, currently in the work force to increase their knowledge, skills and certifications and to stay relevant in their job industry. In order for these students to develop themselves, on site hourly childcare will be provided as well as in house areas to gather and communicate with others, who are doing the same.

The inspiration for the 2019 NEXT HUB plays on the idea of “private, public, alone, together” from NEXT. Creating a space that focuses on the mind, but also the body of its students is essential. The idea of having all like spaces such as the Private groups, Classrooms and Communal spaces together is to help compartmentalize functions of those groups. In the human body, there are four major organ systems. All the components of those systems are proximate to each other. Having areas with like functions together helps to increase productivity.
